

# COVID-19 vaccine myths, debunked

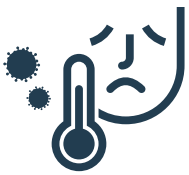

## VACCINE MYTH

## VACCINE FACT

**It isn't safe because it was rushed.**

Large studies have shown that all three vaccines are safe & effective. There were no safety shortcuts.

**It will give you COVID-19.**

None of the vaccines use the live version of the virus, so you cannot become infected because of it.

**It will change your DNA.**

The vaccines will not change your DNA or alter who you are in any way.

**I already had COVID-19, so I don't need it.**

We don't know how long natural immunity lasts. Even if you've had it, you should still get vaccinated.

**It causes women to be infertile.**

There is no evidence that any of the vaccines cause infertility.
